Name: K M N S SILESH

College: Dayananda Sagar University

Year: 4th Year

Market Overview + User Persona:

K-12 Education Scenario in India:

- **Population & Scale:**
  1. More than 250 million K-12 students.
  2. Very high pressure to perform in academics by board exams, entrance exams (JEE/NEET), and competition.
- **Key Trends:**
  1. Fast pace of digitization post-COVID: extensive use of apps such as BYJU'S, Vedantu, Toppr, and YouTube.
  2. Move towards blended learning: usage of online apps along with offline coaching.
  3. Increased access to smartphones: >70% of rural Indian students use mobiles to learn (ASER 2023).
- **Gaps in Existing Solutions:**
  1. Expensive high-end edtech models cut out most middle/lower-income families.
  2. Missing personalized learning paths in most tools.
  3. Passive video-based content tends to cause low engagement and retention.
  4. Insufficient emphasis on AI-powered feedback and adaptive testing for betterment.
  5. English-dominant content tends to isolate regional-language learners.

Growth Strategy for EaseLearn AI:

Goal: Reach and engage students in India's K–12 segment using cost-effective, scalable tactics.

- **School & Tuition Partnerships (Foot-in-the-Door Strategy):**
    1. Partner with affordable private schools or local tuitions in Tier 2/3 cities.
    2. Provide freemium tools to teachers (e.g., doubt-solving dashboard or AI quiz generator).
    3. Offer branded printable worksheets/QR-linked homework using EaseLearn AI.
- **Student-Led Referral Campaigns: "Bring a Buddy":**
    1. Reward-based leaderboards such as data packs, digital certificates, and coupons.
    2. Make students able to form study groups within the app friends can via against each other in quiz challenges.
- **Short-Form Content + Memes for Instagram & YouTube Shorts:**
    1. Create "Relatable School Struggles" with humour, memes, and AI tips.
    2. Use Reels such as: "What students think vs. What actually happens during tuitions"
- **Student Creators Collabs with Influencers (Micro-EdTech Niche):**
    1. Collaborate with local language YouTubers/Instagram-style content creators (5K–50K followers).
    2. Emphasize genuine testimonials: "I used EaseLearn to correct my math fundamentals prior to boards."
    3. Promote voiceovers in local languages for deeper regional connect.
- **Offline Campus Events – "EaseLearn Challenge Weeks":**

  Collaborate with schools for 1-week leaderboard events .
